BUDGET CALENDAR 2014/2015

- ❖ January *BUDGET KICK OFF:* The budget calendar for 2014/2015 is being reviewed and changes or key issues to be addressed and discussed in preparation of the new budget year.

Begin Capital Improvement Program (CIP) process and planning.

Discuss and review Capital Improvement Program (CIP) with the Board.

Will distribute budget worksheets to department heads to complete and return to Village Treasurer by January 20th.

Employee evaluations will begin for non-union employees.
- ❖ February Fine tune first draft of CIP.

Village Treasurer enters preliminary budget numbers into system.

Review and discuss water/wastewater rates and connections rates for adoption in March.

Non-union department heads will review employee evaluations with the Village Administrator and then follow up with employees.
- ❖ March Departmental review of preliminary budgets.

Village Administrator reviews proposed budget with Treasurer along with Department Heads.

Village Board is given a draft copy of the preliminary budgets.

Recommend the necessary increases for water/wastewater rates and connection fees.
- ❖ April Financial policies distributed to Department Heads to see if they have any comments, changes or updates to these policies.

Strike out version of FP given to the Board for review.

Village Board reviews final budget and CIP documents.

❖ May Proposed budgets are in effect.

Treasurer updates cash balances and any necessary changes.

Notice of Budget Hearing will be published in the Mahomet Citizen on May 15th.

A copy of the Village's proposed Annual Appropriation Ordinance will be available for public inspection on May 16th.

A public hearing will be conducted on Tuesday, May 27th at 6:00 p.m. to review the Annual Appropriation Ordinance.

Village Board has the public hearing on the 27th and adopts FY2014/2015 Budget, Financial Policies and Capital Improvement Plan.

Introduction:

The Fiscal Year 2014/2015 Appropriations Ordinance or “Financial Plan” establishes the direction for all Village government programs and services for the coming fiscal year. It represents the synthesis of Board guidance and staff recommendations on how to best accomplish Village goals and respond to community needs in accordance with available resources, established policies and sound administrative practices. Review and approval of the “Financial Plan” is one of the Board’s primary roles.

Currently, staff is presenting a tentative budget for the Board to review and make suggestions for the upcoming fiscal year. In the tentative budget a few new items are one-time expenditures e.g., parking lot repair, ESDA notification, phone system upgrade, financial system upgrade. Other expenditures are recurring expenditures e.g., operational, staffing, lease/bond payments. The only new vehicle, proposed in this budget is a new squad car. Personnel expenditures are growing according to inflation for wages, health insurance and pensions. Staff has projected an increase in health insurance at 20% for FY14/15.

There have been no additional full time positions included in this budget document. A seasonal part-time person may be hired for the transportation department depending on funding. The part-time person in transportation would have no additional benefit other than social security and work less than 1000 hours. An Engineering technician is a possibility at a later date in this fiscal year. This position would have to be funded out of the engineering line item out of Community Development and the Public Works department. This position will only be considered if it can be justified by reducing engineering fees this year and in future years.

The Village will face some long term financial challenges with increases in health insurance cost and future pension costs for the police department. Estimated cost for police pension by the Illinois Department of Insurance is in excess of over \$1M. for unfunded accrued liabilities. The Village will need to focus on finding more effective measures to reduce expenditures, efficiency in staffing and continue to provide quality services in the near future. Staff is concerned that in future years the Village’s financial health may be in jeopardy.

Financial policies are in place targeting guidelines for budgeting purposes. Authorized expenditures to support ongoing operations shall be less than recurring revenues anticipated for the same period. A target of recurring expenditures at 99% of recurring revenues shall be used in preparing the proposed budget. Capital Improvement funds or levied funds do not comply with this policy due to prior year’s savings or tax levy requirements. According to Board direction, other funds will not comply with this policy e.g., Recreation. Fund balance contingencies of no

less than 10% of expenditures excluding transfers and one time expenditures are also stated in the Financial Policies. It is recommended that the General Corporate Fund has at least \$1,000,000 as an ending balance for four months of operational expenses.

Each fund has a specific purpose and is appropriated in the Appropriation Ordinance. If a fund exceeds this appropriated amount then a contingency item will have to be added. In previous years, the Village has had a contingency of \$250,000 for any unexpected or unforeseen expenditures. However, projections require making a number of assumptions, and many things can change throughout the year.

Staff is prepared to make revisions upon Board review and discussions. Staff has summarized various items in the FY `14/15 budgets:

01-General Corporate

- Revenues for budgeting purpose have only increased slightly over 2%.
- Sales Tax has been reduced to \$650,000. Last year \$660,000 was budgeted and approximately \$641,200 is estimated for year-end.
- Income Tax has been adjusted to reflect state-shared revenue estimates or \$97.80 per capita for an amount of \$700,000.
- Real Estate Tax distribution for the General Corporate fund has increased approximately \$54,000 from last year.
- \$172,500 transfer from the Utility Tax fund to help support the police operations has been scheduled for FY14/15. This is the same as the previous year.
- Other revenues remained the same as last year, e.g., permits, liquor license, fines.
- \$86,185 transfer for the Fiber fund has been scheduled to cover the Village's connections.
- The transfer to Economic Development and Transportation Capital Improvements are the same as last year at \$50,000.

01-10 Police Department

- \$25,000 one-time expense for parking lot repair.
- Metcad has increased to \$45,000 from \$24,500
- \$4,000 for humidifier
- \$120,000 transferred to Police Pension fund

01-20 Transportation Department

- \$17,000 budgeted for seasonal part time position and one temporary position. This is an increase of \$9,000 over last year's budget of \$8,000.
- Building maintenance reduced to \$5,000, last year the budget number was \$20,000.
- \$55,100 for lease payment. Remainder of \$50,000 taken out of the Vehicle Replacement fund.
- Real estate tax payment to pay the 2013 taxes for the Transportation Facility.

01-30 Administration

- Financial System upgrade will be taken out of the Capital equipment fund \$42,000.
- Computer support increased from \$10,000 to \$15,000.

01-40 Community Development

- \$160,000, an increase of \$65,000 over last year's budget of \$95,000.
- Legal has increased from \$65,500 to \$85,000 an increase of \$19,500.
- Wages increased due to the hiring of the Inspector and wage allocations to \$125,175.

01-45 Public Works Department

- Decreased staffing for part-time from \$10,000 to \$0.
- Engineering decreased from \$30,000 to \$5,000.

01-60-ESDA

- \$15,000 will be taken out of the Capital Equipment fund for \$15,000. This will create a decrease from last year's budget.

02-Water Operations and Maintenance

- The Enterprise funds do reflect an increase in water rates.
- Transfer to capital improvement is \$25,000, last year the transfer was \$200,000.
- Debt Retirement is \$200,913 for FY14/15.

03-Wastewater Operations and Maintenance

- The Enterprise funds do reflect an increase in wastewater rates.
- Chemicals increased from \$6,000 to \$20,000.
- Utilities decreased from \$95,000 to \$80,000.
- Transfer to WWTP expansion in the amount of \$765,000. Last year the transfer was \$600,000.
- Transfer to capital improvement \$57,745 decreased from \$150,000
- Debt Retirement is \$187,213 for FY14/15.

04-Wastewater Capital Improvements

- Budgeted for 20 new connections for a revenue stream of \$44,250
- Capital improvement that are budgeted for include:
 - Oversizing \$20,000
 - Main Extensions \$45,000
 - WEMIS \$250,000

05-Water Capital Improvement

- Budgeted for 20 new connections \$21,100.
- \$25,000 transfer from WOM
- Capital improvement that are budgeted for include:
 - Oversizing \$16,000
 - Main Extensions \$30,000
 - Lincoln Street Waterline \$87,000
 - Franklin Street Waterline \$125000

06-2003A Bond Issue

- This fund is supported by the Water and Wastewater operations in order to make the bond payment for the water treatment plant and the re-financing of the 1992 Bond Issue.

10-Economic Development

- The transfer from the General Corporate fund is \$50,000, the same as last year.

11-Recreation Department

- Recreation budget basically remained the same as last year.
- A transfer of \$14,000 is scheduled from the General Corporate fund to help support the recreation programs, as previous years.

12-Parks Department

- Grant Income has been included for \$53,200 for the pathway.
- The Utility Tax transfer is the same as last year \$172,500.
- Capital Improvements for \$149,400 has been included in this budget.

16-Motor Fuel Tax

- Revenues are slightly less than last year due to the decrease in the Capital Bill Program from \$21,179 to \$10,756.
- Maintenance expenditures, State Street and Salt Building are \$380,765.

17-IMRF and 19-Social Security

- Main source for revenues for these funds are real estate tax.
- Expenses are higher than expected and do not conform to the financial policies. The expenses are overstated so that we can levy an appropriate amount for the following year expenses.

18-Police Pension Fund

- Transfer from the General Corporate budget in the amount of \$120,000.
- Real Estate Tax revenue estimated at \$97,600.
- Expenditures are estimated at \$59,600

22-Insurance

- Main source of revenue is real estate taxes.
- Expenses are higher than expected and do not conform to the financial policies. The expenses are overstated so that we can levy an appropriate amount for the following year expenses.

25-Forfeited Fund-Federal

- Minimal balance. Anticipate more revenue possibly this year or next from seized property.

26-Forfeiture Fund

- Supported by drug related fines and only specific police expenses can be taken out of this fund.
- \$6,000 has been expensed for purchases with the police department.

27-Bond Issue Fund

- This fund is supported by real estate tax in order to make the bond payment on the Eastwood/Franklin project improvement.
- This bond issues will be paid in full Dec. 2023

28-Utility Tax

- Utility Tax fund helps support the police department and parks. A \$172,500 transfer is budgeted for the general corporate account; \$172,500 is budgeted for the parks.
- \$15,000 to the Vehicle Replacement fund for a new squad car.

29-EDP

- Currently, has a minimal balance and will be closed this fiscal year.

30-2012A-Bond Issue

- Final payment will be made to Cross Construction. The account will have a balance which will be used for a future project.

31-2012B-Bond Issue

- Minimal balance and will be closed this fiscal year.

32-Debt Service for 2012A and 2012B

- Transfer from TIF in the amount of \$340,525 for bond payments.
- Bond Payments scheduled for \$334,875.

33-TIF District

- Revenue source consist of real estate tax distribution.
- Expenses are for disbursement to taxing entities and bond payments.
- Fiber cost of \$81,390.

34-Capital Equipment/Vehicle Replacement

- Transfer from WOM/WWOM \$30,000.
- \$15,000 from the Utility Tax fund for a new squad car.
- Financial System upgrade will be taken out of the Capital equipment fund \$42,000.
- \$15,000 for the ESDA notification system.
- Partial lease payment \$50,000
- \$79,000 shown as vehicle/equipment revenue and also as an expense for the Transportation equipment.

35-Transportation Capital Improvement

- Simplified Telecommunications Tax revenue has been budgeted at \$185,500.
- Transfer to TCI from GC is \$50,000.
- Specific projects are listed on the CIP sheets totaling for a total of \$347,100.
- Transfer to complete Eastwood/Franklin Street project for \$13,163.

36-Street Improvement Project

- Final payment to the contractor for \$110,500 and then this account will be closed.

37-Wastewater Treatment Plant Expansion

- Transfer of \$765,000 from WWOM for loan payments
- Loan interest payment, construction cost along with the debt reserve has been accounted for in this fund.

39-2003B Bond Issue

- This fund is supported by the Wastewater operations in order to make the bond payment for the East Mahomet Interceptor Sanitary Sewer Bond Issue

40-E-Pay

- This fund is a way for people to pay their water/wastewater bills with a credit card. Revenues and expenditures are usually the same.

43-Conway Farms Phase 2-should be closed out in this fiscal year

46-Transportation Facility

- Construction and improvement to the new building. This funding source will be expended and closed out this fiscal year.

47-Transportation Facility Debt Service

- Bond interest payment has been scheduled for \$55,619

48-Fiber System

- Transfer from GC in the amount of \$86,185. This account will be closed after completion of project.

Conclusion

The 2014/2015 Village budget is prepared conservatively. With the economic outlook, the Village must position itself to better respond to fluctuations that will undoubtedly occur in the future. Staff will continue to monitor revenues and expenditures.

REVENUE OVERVIEW

The principal revenue sources for fiscal year 2015 are ad valorem taxes on real property located within the Village, the Village's portion of the State sales tax on retail sales as well as the sale of water (and sewer use fees associated with those sales), bond proceeds for capital projects, the Village's share of State Income tax and other significant sources. This section describes the major revenue sources for each fund and includes a discussion of the trends and significant events, if any affecting these sources.

GENERAL FUND

The General Fund accounts for most of the operating functions of the Village and has the most diverse sources of revenue. The primary sources of revenue are the property tax, sales tax, per capita share of the state income tax, and telecommunications tax.

PROPERTY TAXES The Village's 2015 tax year levy for the General Fund includes funding for operations. Tax caps have a significant impact on the amount levied compared to what is actually received. Because of tax caps, our levy can not be increased more than 5% or the CPI, whichever is less. Below is the amount of the current years tax levy as well as the amount we received.

Fund	Capped Rate	
	Levied	Extended
General	673,219	522,347

Sales Tax

The state distributes 1% of the basic 6.25% sales tax collected within a municipality to the municipal government. This tax is imposed on the sale of tangible personal property including food to be consumed off the premises and medicines and medical appliances. Home rule municipalities can impose an additional rate with limitation in .25% increments. There are no restrictions in the use of this revenue.

Non-home rule municipalities may impose an additional 1/2 of 1% by referendum to be used only for infrastructure improvement. Infrastructure is defined as: streets, bridges, sidewalks, waste disposal system, water and sewer line extension, water distribution and purification facilities, storm water drainage and retention facilities and sewage treatment facilities.

In addition to the sales taxes returned to the municipalities based upon local sales, municipalities also receive State Use Tax. The Use Tax is distributed on a per capita basis.

Illinois State Income Tax

STATE INCOME TAX - The Village receives a portion of the 5.0% State income tax on individuals and 7.0% tax on corporations. 6% (used to be 10%) of income taxes are shared and distributed to local governments and is determined on a per capita basis and is dependent on the overall condition of the State's economy. The municipal share of State income tax is controlled by the state legislature and is subject to change at any time.

New Tax Rates:

The legislation includes a number of increased tax rates:

In 2011 - 2014, the individual tax rate increases from 3% to 5%; and the corporate rate increases from 4.8% to 7%.

In 2015 - 2024, the individual rate is 3.75%, and the corporate rate is 5.25%; and

In 2025 and thereafter, the individual rate is 3.25%, and the corporate rate is 4.8%.

The legislation does not provide municipalities with any share of the increased taxes.

LGDF Distributions:

From February, 2011 through January, 2015, the distribution is 6% of the net revenue received from the 5% individual rate and 6.86% of the net revenue received from the 7% corporate rate;

From February, 2015 through January, 2025, the distribution is 8% of the net revenue received from the 3.75% individual rate and 9.14% of the net revenue received from the 5.25% corporate rate; and

From February 2025 and thereafter, the distribution is 9.23% of the net revenue received from 3.25% individual rate and 10% of the net revenue received from the 4.8% corporate rate.

A potential problem is that this distribution scheme fails to account for a situation where the income tax rates could be reduced by State spending limits. The legislation attempts to maintain the status quo for LGDF distributions. It gives municipalities a lower distribution percentage of a higher tax rate in an effort to maintain the same level of funding. The legislation also provides for a mechanism for the tax rates to revert to current levels if the State overspends, but it does not provide for a mechanism to restore the LGDF distributions to their current levels. Therefore, if the tax rates fall due to the State's overspending, then municipalities will have a lower distribution percentage of a lower tax rate. For example, if the individual tax rate reverts to 3%, then instead of receiving 10% of the 3% rate (under the status quo), municipalities would receive only 6% of the 3% rate. In that case, municipalities will lose out on LGDF money.

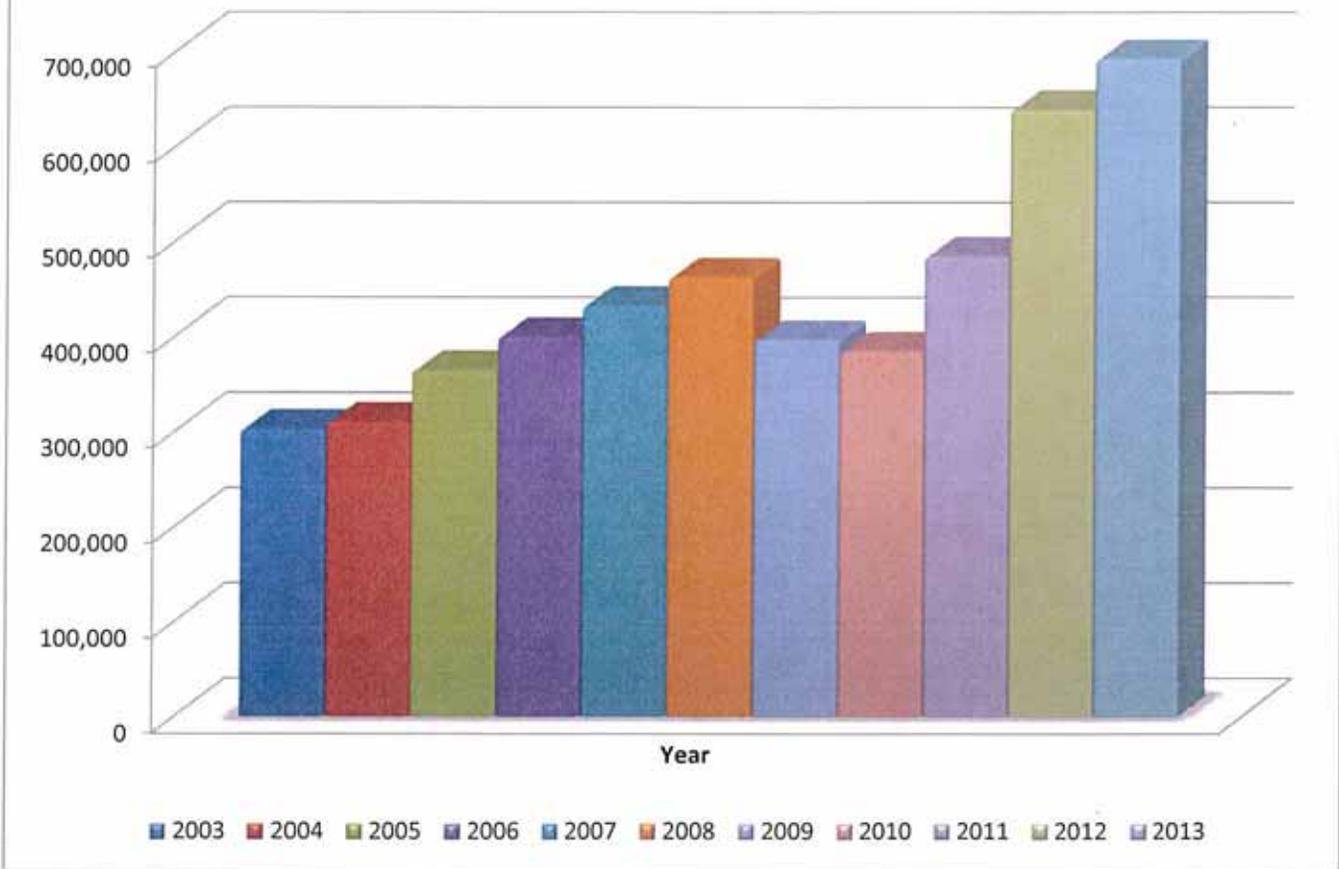

ESTIMATED FUTURE REVENUES LOST TO LOCAL GOVERNMENT

When legislation was approved to raise the income tax without providing local government with a share of the increase, there was a significant loss of revenue growth for municipalities and counties.

The IML has estimated the opportunity loss for the first four years when the Illinois income tax has been increased from 3% to 5% on individuals and 4.8% to 7% on corporations. For the years 2012 - 2015, the IML estimates that local governments would have received \$220 more per capita or a total of \$2.9 billion more for all municipalities and counties if the 10% local share had been retained.

In 2012, the IML forecasted that \$80 per person will be distributed to municipalities. The IML has used a growth projection of 2.5% per year for the following three years to \$82, then \$84, and then \$86 per capita. If municipalities and counties had received their historic 10% local share, municipalities and counties would have received more than \$50 per person in additional revenue in the coming year and in each of the following three years.

Simplified Municipal Telecommunications Tax

SIMPLIFIED MUNICIPAL TELECOMMUNICATIONS TAX - The Village levies a 6% (State gets 7%) tax on all telecommunications activity. Telecommunications includes messages or information transmitted through use of local, toll, and wide area telephone service, private line services, channel services, telegraph services, teletypewriter, computer exchange services, cellular mobile telecommunications service, specialized mobile radio, stationary two-way radio, paging service, or any other form of mobile and portable one-way or two-way communications, or any other transmission of messages or information by electronic or similar means, between or among points by wire, cable, fiber optics, laser, microwave, radio, satellite, or similar facilities.

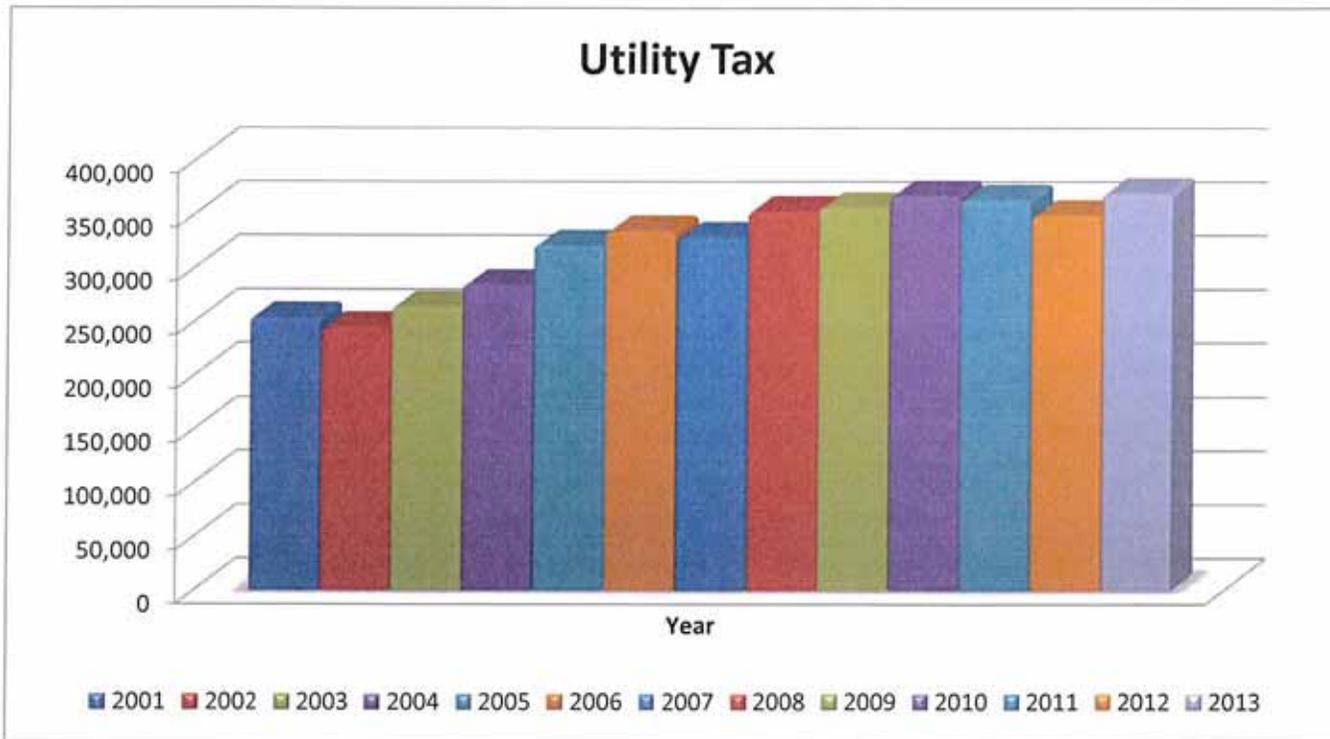

Beginning in January 2003, the State Department of Revenue began collecting this tax on behalf of all municipalities and remitting payment monthly. This has greatly simplified the process of collecting and tracking this revenue. In recent years, telecommunications tax receipts have declined because many cellular phone providers are offering free long distance services and competition has driven down the cost of service. Additionally, a new law which went into effect in January 2007 exempted DSL service from the tax. As the chart shows, telecom revenue has been relatively flat for the last few years.

INTERGOVERNMENTAL REVENUE

The Village receives Personal Property

Replacement Tax (PPRT) and Local Use Tax from the State of Illinois. PPRT is a tax imposed by the General Assembly to replace revenue lost by units of local government as a result of the abolition of ad valorem personal property taxes several years ago. Local Use Tax is a tax imposed on the privilege of using, in Illinois, any item of tangible personal property (e.g. vehicles, boats, aircraft) that is purchased outside the State at retail and then registered in Illinois or is sold by a retailer outside of Illinois and then shipped to Illinois residents and businesses (e.g. office supplies, clothing, etc). The tax is collected by the State of Illinois and with a few exception, is remitted to each municipality based on population. Revenue estimates are based on projections provided by the Illinois Municipal League and the State of Illinois Department of Revenue.

MOTOR FUEL TAX FUND

This fund accounts for the intergovernmental revenue from the State's tax on motor fuel products sold at retail. This statutory formula is used which results in the distribution to local governments based on per capita. The size of the road program affects the amount of MFT used for capital improvements.

The motor fuel tax also is a source of revenue that the state shares with local governments. Intended to be used for the construction and maintenance of local roads, the state allots funds to counties, municipalities, townships and road districts. Of the funds set aside for local governments, Cook County receives 16.74%, the other 101 counties get 18.27% based on their share of motor vehicle license fee collections, municipalities get 49.10% based on their population, and townships and road districts receive 15.89% in proportion to township and road district mileage.

Vision and Mission Statements

During the last calendar quarter of 2013, Village Board members and Village Staff participated in a series of strategic planning sessions facilitated by Learning Alliances Company. The sessions brought out the groups understanding of the strengths, weaknesses, opportunities and threats facing our village. The lists generated by the discussion led the group to place a ranking on the issues to help determine our vision and mission. The lists then helped the group determine the goals established by both the Board and Staff. A big benefit of this exercise is to give Staff direction for the work they do and the items they propose in the budget that the Board ultimately approves.

Vision

Preserve, protect and enhance our community's quality of life

Mission

Provide for the needs of today and prepare for the demands of tomorrow while remaining mindful and respectful of the past.

Goals

Goal #1 Maintain long-term financial strength through fiscal responsibility and discipline.

- Sub-Goal #1.1 Predefined goals assist in setting annual budget.
- Sub-Goal #1.2 Transparency is more clearly defined using public engagement methods.
- Sub-Goal #1.3 Define process to obtain additional grants.
- Sub-Goal #1.4 Update ordinances and policies.

Goal #2 Foster proactive economic and community development initiatives.

- Sub-Goal #2.1 Update economic development work plan.
- Sub-Goal #2.2 Comprehensive plan update.
- Sub-Goal #2.3 Subdivision ordinance update.
- Sub-Goal #2.4 Implement Public Works master plan.
- Sub-Goal #2.5 Adopt an annexation policy.

Goal #3 Invest in community enhancements that promote growth and competitive advantage.

- Sub-Goal #3.1 Create a visual brand identity.
- Sub-Goal #3.2 Develop strategies for implementation of bikeways, greenways, rivers, multi-mode transp.
- Sub-Goal #3.3 Continuing to pursue MAARC.
- Sub-Goal #3.4 Investigate partnerships.

FINANCIAL POLICIES 05/01/2014

INTRODUCTION

The Village's annual Appropriations Ordinance establishes the direction for all programs and services of the Village government for the coming fiscal year. Formal statements of the Village's policies provide the foundation for this direction while maintaining effective management of the Village's financial resources. This document outlines the policies used in guiding the preparation and management of the financial plan.

POLICY IMPLEMENTATION AND MONITORING

The Financial Policies provide the framework within which resources are allocated to allow staff to accomplish Village objectives consistent with other guiding policies such as the Comprehensive Plan, East Mahomet Redevelopment Plan, Parks and Recreation Master Plan and other **Board** approved Master Plans. The staff budget proposal is designed to conform to these guidelines. Following adoption of the budget, staff reviews budget reports monthly to ensure that expenditures are in line with the Boards approved budget. Monthly reports are provided for Board review.

Each year the Village Board adopts financial policies to guide the development, adoption, and execution of the budget for the following year. So that the basis for financial planning is constant, the current year's policies are the basis of the new year's policies. All policies are reviewed by the Board of Trustees to determine whether changing circumstances warrant revisions.

I. Statement of Purpose

These policies are designed to establish a financial structure for providing quality services to the community in an efficient and effective manner while maintaining long-term financial stability within statutory limitations and as established in the policies. These policies are reviewed, modified as appropriate, and re-adopted annually.

Reason for the policy:

This statement explains the purpose for establishing a financial policy framework.

II. Basic Municipal Services Funded Through The General Operating Fund

Municipal services such as public safety and public works, e. g. police patrol, maintenance of Village streets and storm drainage systems, are the Village's first responsibility. These services are funded to at least maintain current service levels. The General Operating Fund, and other funds, as appropriate, will provide transfers to the vehicle/capital equipment replacement fund **and make lease payments**, to maintain equipment at least at current service levels. The General Operating Fund also provides a transfer to the TCI to maintain streets, sidewalks, drainage and capital improvement project.

Reason for the policy:

Given that budgeting involves allocation of resources among different functions, this policy articulates the Board's desire that basic municipal services be maintained at current service levels before more discretionary services are considered.

How the budget conforms with this policy:

As part of the fiscal planning process, existing services are allocated sufficient funds to continue at current levels. Every effort is made to restore these services with adjustments consistent with financial policies and financial planning.

III. Economic Development Programs

The Economic Development Fund. The Economic Development Fund receives revenues from the Village's Hotel-Motel Tax, approximately \$2,000 per year, fund raising events and is supported by a transfer from the General Operating Fund. The intended use of these funds is to promote economic development, which will benefit the Village's residents. This fund specifically provides, for the Village's membership dues to the Champaign County Economic Development Corporation and Mahomet Chamber of Commerce. Also, this fund is used to promote tourism, e.g., Sangamon River Music Festival.

General Operating Fund: The General Operating Fund contributes resources to economic development through staff support of economic development-programs. Additionally, the fund may provide for payment of economic development incentives including relevant property tax rebates and sales tax rebates.

Tax Increment Financing District (TIFD) Fund: The TIFD monies will be used for a variety-of economic development activities within designated areas in accordance with State statute. Such economic development activities are

described in detail in adopted development plans for the TIF. Currently, an industrial park located in the TIF district is in the planning stages for future development. **An Economic Development Program Grant and issuance of bonds have promoted street improvements along with the extension of water and wastewater lines in the TIF area**

Evaluation of Economic Development Agencies: Economic development marketing, and growth, in theory, is promoted through the Mahomet Chamber of Commerce and the Champaign County Economic Development Corporation. The Champaign County Economic Development Corporation conducts an active program of prospecting for new industry and regular retention visits with participation by Village staff. The Mahomet Chamber specifically promotes local businesses and the Village's unique charm. Funding for these organizations is evaluated annually in conjunction with review of the Economic Development budget.

How the budget conforms with this policy:

The budget includes funding for Economic Development Agencies, tourism, the Tax Increment Financing District and certain capital improvement projects.

IV. Water and Wastewater Systems

Revenue from Water and Wastewater user fees shall primarily support the operations and routine maintenance of the Village's water and wastewater systems, which will be accounted for on an enterprise-fund basis. An accounting system will be implemented to ensure that all costs related to operations and routine maintenance, as well as engineering expenses and administrative costs incurred to administer the fees, will be either directly or indirectly, paid from revenues raised through the fee.

Water & Wastewater Fee Rates: The Water and Wastewater Fee rates have been reviewed annually since 2003. If the fee does not fully support system operations, including rehabilitation, maintenance and expansion, or if excess balances are projected, staff will recommend changes to the Board. Changes would be effective annually or as otherwise prescribed by resolution, with review taking place as part of the budget development process for the fiscal year in which the change would be effective.

Water and Wastewater-Capital Improvements Fund: Water and Wastewater connection fees are allocated for capital improvements related to upgrade and expansion of the systems. Connection fees and extension revenues will be credited to the Water and Wastewater Capital Improvements Funds.

Facilities Fee: The revenue generated by the facilities fee is dedicated to Water and Wastewater plant upgrades, **maintenance**, expansions and debt service obligations. Currently, a \$5.00 facility fee is assessed to each water and wastewater account which is applied to each enterprise fund.

Reason for this policy:

These fees were implemented to fund operating and capital expenditures to rehabilitate, upgrade and expand the water and wastewater infrastructure in the Village.

How the budget conforms with this policy:

Fees are budgeted at their present rate to support current service levels and debt retirement schedules. The Board of Trustee's passed an ordinance on **April 8, 2014** implementing a \$.01 water rate increase and a **\$.09** increase in the wastewater rates for **FY 14/15** to provide for current and future water and wastewater needs. The Village has increased connection fees as stated in Ordinance No. **14-03-02** and Ordinance No. **14-03-03**. The Water Connection fee, meter and inspection will be **1,055.00** for **FY 14/15** and the Wastewater Connection fee and inspection will be **\$2,212.50** for **FY 14/15**.

V. Property Tax Rate

Total Village Property Tax Rate: It is the Village's goal that current service levels be achieved with the property tax rate that does not exceed those authorized by statutory tax caps. Increased service levels may warrant an increase, subject to voter approval, beyond the capped rate; other factors may warrant a decrease in the rate. In addition, trends in federal and state government may require that the revenues received from property taxes, and thus the tax rate goal, be reviewed in the future. These trends include, but are not limited to:

- decreases in state and federal revenues;
- inflation which increases the costs of municipal services;
- changes in federal tax law; and mandates by the state and federal governments, which increase the cost of municipal services or impose new services, e.g., enacted state legislation which would require municipal employers with 5 or more employees to recognize employees petitioning to bargain collectively.

Factors which may warrant a decrease in the property tax rate, include, but are not limited to:

- any other source of new, recurring revenue;
- a reduced cost for providing current services; and/or
- a reduction in services funded through the levy, e.g. ESDA, where this function is assumed by the County or other local public safety organizations.

Property Tax Levies for Pension Funds: Property taxes are levied for the Social Security, Illinois Municipal Retirement Fund and the Police Pension Fund based on pension funding needs, which are determined by law.

Corporate Tax Levy: "Corporate" levy revenues are allocated to the General Operating Fund. The amount levied is based upon the allowable annual capped tax rate and funding requirements for other purposes described above.

Reason for the policy:

This policy formally confirms the property tax cap restrictions so that the Village's tax rate will be in compliance with statutory requirements. However, the policy also recognizes that the Board may wish to seek a referendum to increase or decrease the capped rate under specific circumstances.

How the budget conforms with this policy:

Consistent with this policy, the FY 2014/15 budget reflects a final capped tax rate of ~~\$.8636~~ .8772 per \$100 of equalized assessed valuation.

VI. Debt Management

Item No. 1 The Village will consider the use of debt financing only for one-time capital improvement projects and unusual equipment purchases, only under the following circumstances:

- when the project's useful life, or the projected service life of the equipment, will exceed the term of the financing; and/or
- when there are designated revenues sufficient to service the debt, whether from project revenues, other specified and reserved resources, or infrastructure cost sharing revenue.

Debt financing is not considered appropriate for any recurring purpose such as current operating and maintenance expenditures.

Item No. 2: The Village will use the following criteria to evaluate pay-as-you-go versus long-term debt financing in funding capital improvements

- Factors which favor pay-as-you-go:
 - current revenues and adequate fund balances are available;
 - project phasing is feasible;
 - debt levels would adversely affect the Village's credit rating; and
 - market conditions are unstable or present difficulties
- Factors which favor long-term financing:
 - revenues available for debt service are considered sufficient and reliable so that long-term financing can be marketed with the Village's current credit rating;

- the project for which financing is being considered is of the type which will allow the Village to maintain its current credit rating;
- market conditions present favorable interest rates and demand for municipal financing;
- a project is mandated by state or federal requirements and current revenues and fund balances are insufficient to pay project costs;
- a project is immediately required to meet or relieve capacity needs; or
- the life of the project or asset financed is ten years or longer.

Item No. 3: General obligation debt may be used in lieu of alternate revenue debt if expenses can be significantly reduced (as compared to financing from self supporting revenues) and if special or enterprise fund revenue available for debt service is considered to be sufficient and reliable. General obligation debt may also be issued for a prescribed purpose unique to infrastructure rehabilitation or expansion.

Item No. 4: Bonded debt will not exceed the legal limit of current assessed valuation, as established by statute.

Item No. 5: An analysis will be prepared by Village staff for each long-term financing; the analysis will assess the impact of debt issuance on current and future operating and capital budgets and address the reliability of revenues to support debt service payments.

Item No. 6: The Village will seek to maintain its current bond rating and financial health and will specifically discuss with the Board any proposal which may cause that rating to be lowered.

Item No. 7: The Village will seek credit enhancements such as letters of credit or insurance when necessary for marketing purposes or cost effectiveness.

Item No. 8: The Village will monitor all forms of debt annually; an analysis will be included in the Village's annual audit; concerns and recommended remedies will be reported to the Board as necessary.

Item No. 9: The Village will follow a policy of full disclosure on every financial report and bond prospectus (Official Statement), voluntarily following disclosure guidelines provided by the Government Finance Officers Association unless the cost of compliance with the higher standard is unreasonable as determined by the Board of Trustees.

Item No. 10: Interfund borrowing and external lending will be considered to finance high priority needs on a case-by-case basis, only when other planned

expenditures in the fund, making the loan would not be affected. Lending may be used when it would reduce costs of interest, debt issuance, and/or administration, or encourage private investment, which might otherwise not take place. Lending shall be limited to 10% of the total cash balances in the Village's Operating and Enterprise funds.

Reason for the policy:

The purpose of the policy is to establish reasonable guidelines for when and how debt should be issued.

How the budget conforms with this policy:

The Village's debt for FY 2013/2014 is ~~\$6,717,098~~ is **\$8,219,000** including financing the refinancing of the Water/Sewer Bonds (water plant expansion, interceptor sewer extension and WWTP) Eastwood/Franklin Improvement, ~~Police Building renovation,~~ **lease agreement for equipment/vehicles, Transportation Facility** and the new TIF Bond Issues for water/sewer and road improvements. The Village was approved for an EPA loan in the amount of \$13,473,000 for the wastewater treatment plant. The total cost, once the project is completed will be added to the Village's debt. The FY ~~2013/2014~~ **2014/2015** budget continues the general policy of paying for almost all major purchases and capital improvement projects on a pay-as-you-go basis.

VII. Budget Guidelines

The following policies are established as more specific guidance to the budget development process:

Item No. 1: Authorized expenditures to support ongoing operations shall be less than recurring revenues anticipated for the same period. A target of recurring expenditures at 99% of recurring revenues shall be used in preparing the proposed budget. Capital Improvement funds or one-time expenses for capital improvement projects/equipment do not comply with this policy due to prior years saving for extensive capital projects. The Recreation fund does not comply due to the projected expenses for current year with the collection of revenue in the prior year. With unknown participation, the Village allocates higher expenditures to cover program expenses that may actually occur. The Forfeited Funds does not comply with the financial policies due to the funding source and restricted expenses. Levied funds, i.e., IMRF, Social Security, Police Pension, Insurance, G.O. Bond issue may not comply with this policy due to the tax levy process and procedures.

Item No. 2: Non-recurring revenues shall be applied toward non-recurring expenditures (capital improvements, capital outlay for major equipment and discretionary activities such as economic development). As an extension of this general policy, fund reserves carried from the prior year shall be expended only for non-recurring projects.

Item No. 3: Adequate reserves shall be maintained for all known liabilities, including anticipated employee leave and separation expenses.

Item No. 4: When equipment is to be acquired, fiscal arrangements should be appropriate for each particular circumstance. For equipment to be permanently acquired, financing through lease-purchase shall be considered whenever the financing cost is determined to be less than the interest that can be earned on Village cash assets or when cash flows do not allow the purchase of a needed piece of equipment. Flexible arrangements (rental) may be used when equipment needs are not permanent, or when changing needs or technologies may make the equipment obsolete. Replacement schedules for all major equipment will be established, consistent with industry standards and experience. Whenever possible, funds will be set aside annually in an amount sufficient to allow replacement of such equipment at the end of its useful life.

Item No. 5: Revenues generated from programs or services should be taken into account when evaluating the cost-effectiveness of the program or service, if the revenues would not be received without those programs or services. For example, a service might be deemed cost-effective if part of the related costs were offset by user fees, but not cost-effective if the Village were to fund the program fully from general revenues without user fees.

Item No. 6: To provide for exigencies, working cash, and as a safeguard against fluctuating revenues, adopted budgets for the General Operating Fund, Special Revenue Funds and Enterprise Funds shall include a Fund Balance Contingency of no less than 10% of expenditures excluding transfers and one time expenditures, with the exclusion of the levied funds and Forfeited Funds, . The E-Pay fund is strictly a pass-thru account for water/wastewater billing and does not require a 10% fund balance. Funds anticipated for close out this year contain no contingencies, e.g., TIF Construction accounts and Bond default account. This shall be in addition to any amounts that may be budgeted for specific purposes (e.g., Salaries Contingency) and shall not be available for expenditure except by Board action. Supplemental budget amendments taking place through the course of the Fiscal Year may cause the contingency to drop below this level. In any case, contingencies for these funds shall not fall below 9% except in the event of catastrophic need.

Items No. 7: Special contingencies shall be established where unusual events and needs are anticipated.

Items No. 8: Fees should be reviewed on a regular basis to maintain cost recovery rates existent when the fees were established. Modifications to cost recovery rates or new fees should be considered where appropriate. In general, fees are applicable when services are not basic or when specific beneficiaries and their relative level of benefit can be identified.

Item No. 9: Grant revenues shall be pursued to provide or enhance Village services. However, recurring activities shall be initiated with grant funds only if one of the following conditions is met:

- the activity can be terminated in the event that the grant revenues are discontinued; or

- the activity should and can be assumed within recurring Village funds in the event the grant revenues are discontinued.

Item No. 10: The proposed budget for the General Operating Fund will be limited as follows:

- expenditures for items other than salaries and benefits may not be increased more than the rate of inflation which will be determined by the Consumer Price Index for the Midwest Region, Class D (under 50,000) for the most recent calendar year;
- large one-time expenses should be excluded from the base in calculating the allowable increase;
- financial commitments previously made by the Board and unavoidable cost increases beyond the level of inflation are not subject to this limitation; and
- calculation of the adjusted base for expenditures and recommended exceptions will be presented by staff for Board review.

Item No. 11: Cost allocations between funds and activities shall be reviewed and established upon a logical and consistent basis. Among the criteria to be weighed are the duties and responsibilities shared and supported by these funds and activities. For example, the water and wastewater operating funds should provide funding for the relevant pro-rata shares of the personnel expenses.

Reason for the policy:

This policy encompasses several guidelines that promote sound fiscal

management. **How the budget conforms to this policy:**

The Village's annual appropriation's ordinance is prepared consistent with these guidelines in order to ensure the Village's sound financial condition.

VII. User Fees

Item No. 1: User fees are appropriate when services are not "basic" or when specific beneficiaries and their relative level of benefit can be identified. "Basic services" are those which the Village wishes to provide to all citizens. An individual may not forego these services because of the potential impact of public health, safety or welfare.

Item No. 2: A service which provides benefit to the entire community and for which the benefit to specific users cannot be measured, or the cost of measuring the benefit to specific users would be prohibitive (e.g. street maintenance) should be funded from general revenues, motor fuel tax or transportation capital

improvement revenues.

Item No. 3: A regular schedule of review will be established for all user

fees. *Item No. 4:* Types of Services which may be funded by User

Fees:

- a** A service which provides benefits to a limited group, but may provide little or no general benefit to the community (e.g. document reproduction, recreation program fees)

- cost recovery, i.e. all direct and indirect costs; and

- rate structure, i.e. flat rate per unit of service.

- b** A service which provides potential benefit to all members of the community and the benefit to each user can be measured or fairly approximated (e.g., wastewater system maintenance, most licenses and permits) cost recovery, i.e. all direct costs; and rate structure based on level of service (e.g., volume, frequency) or flat rate for licenses and permits.

"Direct costs" include all costs of performing the service, regulating the activity being licensed and collecting the fee, including staff time and benefits.

"Indirect costs" include a proportionate share of budgeted expenditures for administrative services, and overhead costs such as insurance and building maintenance.

Item No. 6: The Board may opt not to charge a fee if it would be in conflict with accomplishing public policy objectives,

Item No. 7: If the cost of administering and collecting a fee is disproportionately high in relation to the cost of providing the service, the service may be funded, in whole or in part, from general revenues.

Item No. 8: In recommending an appropriate rate, staff will consider similar fees charged by other jurisdictions in close proximity and of similar size, with similar operations. Where the Village service is in direct competition with other public entities or the private sector, e.g., Recreation fees or water/wastewater user fees, Village fees should be competitive unless there is specific public purpose achieved by leading or following those other rates.

Item No. 9: Citizen Participation: The opportunity for public input will be held before any new fee or fee increase is instituted. Village staff will also make a reasonable attempt to inform specific parties directly by means of meetings and/or notification of availability of documents for review.

Item No. 10: Current Services Funded from New User Fees: When any fee is instituted to fund services currently funded from general revenues, the Village will consider whether general revenues should be reduced accordingly, or whether those revenues should be targeted to some identified purpose.

Reason for the policy:

The policies specify under what circumstances user fees are appropriate.

How the budget conforms with this policy:

Particularly because of the limits of Property Tax Rate Caps, staff recommends that the Board look generally at revenue enhancements to keep pace with the Village's cost to provide services. The Simplified Telecommunications Tax was approved by the Board of Trustees in February 2004 and implemented in July, 2004, and is being used to fund improvements to the transportation.

IX: Potential Revenue Sources

For any proposed additional revenue sources, the Board will consider the following criteria:

- Community acceptability;
- Competitiveness, the revenue or tax burden of Mahomet relative to neighboring communities;
- Diversity, the balance of revenue sources that can withstand changes in the business cycle;
- Efficiency, the cost of administering a tax or fee should bear a reasonable relation to revenues collected, and any new tax or fee should have minimal effect on private economic decisions; and
- Fairness, the distribution of Mahomet's revenue burden as measured by ability to pay, the benefits received or the community's definition of the resident's fair share of the revenue burden.

Reason for the policy:

This policy establishes guidelines for assessing proposed new revenues.

How the budget conforms with this policy:

Potential revenues discussed with the Board are evaluated using these guidelines.

X. Pension Funds

The benefit provisions are governed by state statute and federal law.

The Illinois Municipal Retirement Fund (IMRF) or **Sheriff's :Law Enforcement Personnel (SLEP)** is used to account for participation by all eligible Village

employees in the IMRF, federal Social Security plans and the Police Pension Fund. Funding requirements are calculated by staff, consistent with federal and statutory requirements, as part of the property tax levy process.

Reason for the policy:

This policy obligates adequate funding to support the Village's pension funds.

How the budget conforms with this policy:

The Village funds its Social Security, IMRF and Police Pension obligations consistent with State and Federal law.

XI. Investment Policy

The Investment Policy is incorporated into these Financial Policies by reference and is attached.

XII. Capital Improvements

The Capital Improvement Policies are adopted as a separate document and are incorporated herein by reference.

XIII. Vehicle /Capital Equipment Replacement

The Vehicle/Capital Equipment Replacement Policies are adopted as a separate document and are incorporated herein by reference.

Village of Mahomet

503 E. Main Street - P.O. Box 259 - Mahomet, IL 61853-0259
phone (217) 586-4456 fax (217) 586-5696

INVESTMENT POLICY

May 1, 2014

A. Scope of Investment Policy

This Investment Policy applies to the investment activities of the Village of Mahomet. All financial assets of other funds, including the General Fund, Special Revenue Funds, Capital Project Funds, Debt Service Funds, Enterprise Funds, Trust and Agency Funds, and any other funds that may be created, shall be administered in accordance with the provisions of this Policy.

B. Investment Objectives

The overall direction of the Village of Mahomet Investment Policy may be found in the following objectives, which have been prioritized and explained to clearly identify the results expected.

- Safety of principal is the foremost objective of the Investment Policy. Investments of the Village of Mahomet shall be undertaken in a manner that seeks to ensure the preservation of capital. Each investment transaction shall seek to first ensure that capital losses are avoided, whether they are from securities defaults or erosion of market value.
- Return on investment. The Village's investment portfolio shall be designed with the objective of attaining a market rate of return throughout budgetary and economic cycles, taking into account the Village's investment risk constraints and the cash flow characteristics of the portfolio.
- Diversification. In order to further guarantee asset safety, the Village of Mahomet shall diversify investments to avoid incurring unreasonable risks from the practice of concentrating investments in specific security types and/or individual financial institutions.
- Public confidence in the investment program is imperative. The Village of Mahomet will avoid any transaction that might impair public confidence. Investments shall be made with judgement and care, under circumstances

then prevailing, which persons of prudence, discretion and intelligence exercise in the management of their own affairs. Such standard, therefore, avoids unwarranted speculation; emphasis is placed on the probable safety of capital rather than the probable income to be derived.

C. Responsibility for the Investment Program

The establishment of investment policies is the responsibility of the President and the Board of Trustees of the Village of Mahomet. Management and administrative responsibility for the investment program of the Village of Mahomet is hereby delegated to the Village Treasurer. The Village Treasurer shall prepare and follow written procedures for the operation of the Investment Program, be responsible for all transactions undertaken, and shall establish a system of accounting controls to safeguard Village assets. The Village Treasurer may from time to time amend the written procedures in a manner not inconsistent with this Policy or with State law.

D. Cash Management

The Village Treasurer shall prepare written cash management procedures, which shall include, but not be limited to, the following:

1. Receipts: All monies due the Village of Mahomet shall be collected as promptly as possible. Monies that are received shall be deposited in an approved financial institution no later than the next business day after receipt by the Village. Amounts that remain uncollected after a reasonable length of time shall be subject to any available legal means of collection previously approved by the Board of Trustees. One of the objectives of the Village's cash management procedures is to comply with the provisions of the Illinois Revised Statutes, which mandates prompt investment of funds.
2. Disbursements: Any disbursement of suppliers of goods and/or services or to employees for salaries and wages shall be contingent upon available budget appropriations.
3. Financial Forecast: At least annually, a financial forecast will be prepared using expected revenue sources and items of expenditure to project cash requirement for future years of the Village. An analysis will be prepared for both operating and non-operating revenues and expenditures. These analyses will provide a guide for determining the length and amount of investments.
4. Pooling of Cash: Except where otherwise provided by the Board of Trustees, the Village Treasurer will be authorized to pool the cash or

various funds to maximize investment earnings where in his/her opinion it is advantageous and prudent to do so. Investment income will be allocated to the various funds based upon their respective participation.

E. Accounting

The assets, liabilities, revenues and expenditures of each fund are maintained as separate entities. All investment transactions shall be recorded in accordance with generally accepted accounting principles as promulgated by the Government Accounting Standards Board. Accounting principles will include:

- Investments will be carried at cost or amortized cost which approximates market value.
- Any premium or discount on investment will be amortized over the life of the investment.
- Gains or losses of investments in all funds will be recognized at the time of disposition of the security.

F. Financial Institutions

It shall be Village of Mahomet policy to select financial institutions on the following basis.

1. Security: The Village shall maintain funds in a financial institution only if that institution is federally insured or invests strictly in securities which have the full faith and credit of the U.S. Government.
2. Location: Every attempt will be made to invest Village funds locally provided local institutions are price competitive with respect to rates of return on comparable investment products.
3. Size: The Village of Mahomet will not maintain deposits in any financial institution in which the Village funds on deposit will exceed 50% of the institution's capital stock and surplus.
4. Statement of Condition: The Village of Mahomet will maintain for public and managerial inspection, current statements of condition for each financial institution named as depository. If, for any reason the information furnished is considered by the Village to be insufficient, the Village may request additional information.

G. Investment Selection

The Village may invest in any type of security allowed for in Illinois statutes regarding the investment of public funds. Approved investments include:

- Bonds, notes, certificates of indebtedness, treasury bills, or other securities, including obligations of the Government, National Mortgage Association and Federal National Mortgage Association which are guaranteed as to principal by the full faith and credit of the government of the United States of America.
- Interest bearing savings accounts, interest bearing certificates of deposit or interest bearing time deposits or any other investment constituting direct obligations of any institution as defined by the Illinois Banking Act and that is insured by the Federal Deposit Insurance Corporation.
- Funds may be invested in fully FDIC-insured certificates of deposits through the Certificate of Deposit Account Registry Service, provided that the other requirements of the Policy have been satisfied.
- Illinois Public Treasurer's Investment Pool.

H. Bidding Procedures on Certificates of Deposit

In obtaining competitive quotations for certificates of deposit at least two(2)-qualified institutions will be contacted each time an investment is placed. In no instance shall an investment be placed without the authority of the Village Treasurer.

Investments shall be placed with the institution that best exhibits the ability to meet the investment criteria and objectives in this policy.

I. Diversification and Maturities

The Village of Mahomet shall diversify its investments to the best of its ability based on the type of funds invested and the cash flow needs of those funds. Diversification can be by type of investment, number on institutions invested in, and length of maturity.

- Maturities of investments shall be selected to enable the Village to have available sufficient cash for all operating purposes.

J. Collateral

It shall be Village policy to encourage that all funds on deposit in banks in excess of FDIC limits are secured by some form of collateral. Direct investments guaranteed by the United States or any agency of the United States do not require collateral.

The Village shall enter into a collateral agreement with any financial institution willing to pledge paid collateral; this agreement shall outline the types of assets that may be pledged as collateral, the amount of collateral required and the placement procedures. The Village shall accept any of the following securities as collateral:

- Negotiable obligations of the United States Government.
- Negotiable obligations of any agency or instrumentality of the United States Government guaranteed by the full faith and credit of the United States Government.
- Pledged collateral will be held by the Village or in safekeeping and evidenced by a safekeeping agreement. The collateral, agreement will preclude the release of the pledge assets without authorized signatures of the Village Treasurer but the agreement may allow for an exchange of collateral of like value.

K. Internal Controls

Where deemed necessary, the Village Treasurer or his/her designate shall establish a system of internal controls, which shall be documented in writing. These internal controls and this Investment Policy shall be reviewed by an independent, certified public accountant in conjunction with the annual examination of the financial statements of the Village. The controls shall be designed to prevent losses of the Village funds arising from fraud, employee error, misrepresentation by third parties, unanticipated changes in financial markets, or imprudent actions by employees.

L. Reporting

The Village Treasurer shall submit a monthly cash and investment report to the Village Board for review.

The Comprehensive Annual Financial Report shall include all investment information as promulgated by the Government Accounting Standards Board.

The Village Treasurer shall periodically suggest policies and improvements that might be made in the investment program.

M. Standards of Prudence

The standard of prudence to be used by the employees responsible for the investment of public funds shall be the “prudent person” standard, subject to the foregoing limitations, which states:

Investments shall be made with judgment and care, under circumstances then prevailing, which persons knowledgeable of investment practices, and persons of prudence, discretion and intelligence exercise in the management of their own affairs, not for speculation, but for investment, considering the probable safety of their capital as well as the possible income to be derived.

The above standard is established as the standard of professional responsibility and shall be applied in the context of managing the Village investment portfolio. This policy recognizes that there are circumstances beyond the control of even the most prudent investor which impact the return obtained. However, officials and employees of the Village acting in accordance with this Investment Policy and written procedures as may be established and exercising due diligence shall be relieved of personal responsibility for an individual security’s credit risk or market price changes, provided that deviations from expectation are reported in a timely fashion, and appropriate action is taken to control adverse developments.

N. Ethics and Conflicts of Interest

Officers and employees involved in the investment process shall refrain from personal business activity that could conflict with the proper execution and management of the investment program, or that could impair their ability to make impartial decisions.

O. Investment Policy Adoption

The investment policy shall be adopted by the Board of Trustees. The policy shall be reviewed on an annual basis by the Treasurer and any modifications made thereto must be approved by the Board of Trustees.

Village of Mahomet

503 E. Main Street - P.O. Box 259 - Mahomet, IL 61853-0259

May 1, 2014

Vehicle/Capital Equipment Replacement Policy

Purpose: The purpose of this policy is to establish procedures for the replacement of Village vehicles and equipment. A scheduled replacement program is included.

Scope: This policy addresses the purchase of all vehicles and all capital equipment owned by the Village.

Responsibility: It is the responsibility of the Village Administrator to assure that all the procedures outlined herein are followed. The Village Administrator will administer vehicle/ capital equipment purchases and provide initial replacement recommendations to the Board of Trustees.

Policy Statement: Upon approval, the Board has established a financial policy providing an annual funding of amortized vehicle expenses to pay for acquisition of replacement vehicles. Allocated funds are held in the vehicle/capital equipment replacement fund. Money from this fund is used for vehicle/capital equipment purchases. This policy will implement Board Financial Policies.

Vehicles and equipment are used to safely and efficiently accomplish Village responsibilities. Vehicle and equipment expense is justified by the increased productivity of equipment and vehicles. The safety of Village residents and employees is as important as is efficient and productive labor by Village employees. To the extent that the comfort of Village employees is a factor in both safe and efficient operation of vehicles and equipment, certain accessories and features, such as air conditioning, that enhance the productivity of employees or the safe operation of equipment and vehicles shall be acquired with vehicles and equipment. Such accessories shall be limited to those that are justified by safety, efficiency, or by operational effectiveness.

The Village shall acquire and maintain a Village fleet of vehicles and equipment as authorized by the Village Board at a level to accomplish the tasks required. The Village Administrator shall take action to reduce the cost of acquiring and maintaining equipment owned by the Village, as well as action to minimize the

size of the Village fleet in consideration of the tasks to be accomplished. The Village Administrator will have primary responsibility for fleet inventory recommendations to the Village Board of Trustees.

Vehicle replacement policies and procedures are divided into three main branches: (1) Vehicle Specification Standards; (2) Vehicle Replacement Scheduling; and (3) Funding of the Vehicle/Equipment Replacement Fund.

Procedures

VEHICLE/CAPITAL EQUIPMENT SPECIFICATION STANDARDS

Prime consideration in writing specifications will be given to the nature of the tasks to which the vehicle is assigned. The specifications shall be written to meet the minimum requirements of the tasks required of the equipment in a manner that results in the lowest average annual cost of owning and operating the vehicle. Additional features justified by safety and efficiency will be separately justified to the Village Administrator prior to bid solicitation. Upon approval by the Village Administrator, these features will be added to the bid specification.

The Village Administrator and staff will utilize the State Joint Purchase Program when acquiring vehicles/equipment for use in the Village whenever specifications and cost effectiveness warrant such use. When equipment is included in the State bid, the specifications provided in the State bid documents will be used for bidding purposes, unless there is compelling reason for changing them.

Bids shall be awarded to the lowest responsible bidder meeting all the stipulations of the bid documents and complying with all requirements of the Village purchasing policy.

Size and Capacity: Vehicles shall be of the minimum size and capacity to perform the tasks required at the lowest total life cycle cost for the equipment.

Accessories: Vehicles shall be bought as generally available factory equipped. Additional accessories shall be purchased only as justified separately. Safety related accessories such as air bags, tinted windshield, rear window defroster, and intermittent wipers shall be included in all vehicle purchases where available. Additional accessories, if not provided as standard equipment, such as radio; electric window, door locks, carpet, cloth seats; air conditioner, tilt steering wheels, cruise control, will be specified when the requirements of the vehicle, or anticipated affects on resale value of used vehicles, can justify such specification. Generally the standards are as follows:

- a. Radios: All Village vehicles shall be equipped with the lowest cost standard AM/FM radio made available by the manufacturer.

- b. Communication radios: All vehicles and equipment assigned to a department utilizing communication radios will be equipped with radios sufficient to the communication system.
- c. Air conditioning system: Passenger vehicles, including pickup trucks, will be equipped with air conditioning. Other trucks and equipment will be so equipped if a specialized function requires air conditioning. Dump trucks used for plowing snow will be equipped with air conditioning. The result of having air conditioning in dump trucks is a larger radiator which is necessary and makes the truck work more efficiently for snow plowing.
- d. Cruise control: Passenger vehicles shall be so specified if the anticipated use of the vehicle will require extensive highway or interstate travel.
- e. Exterior trim packages: Specifications will include bump or nick protection guard trim where available and when such protection is available and when such protection is available at a reasonable cost and does not require features not otherwise specified.
- f. Interior trim packages: Specifications will include carpeting and cloth seats for passenger vehicles and pick-up trucks. Other equipment may be equipped with minimum cost interior finishing.
- g. Caution lights: All equipment acquired to be used as a working vehicle shall be equipped with high visibility caution lights, mounted as top lights or as designated by the Department Superintendent/Director. Working trucks assigned to routinely work in traffic lanes in maintenance activities, such as patching streets, shall be equipped with rear mounted arrow boards or other warning device as deemed appropriate by the Village Administrator.
- h. Tool boxes: Pick-up/Utility trucks will be equipped with sufficient lock-able tool storage chests to secure equipment normally assigned to the personnel utilizing the vehicle.
- i. Rustproofing/Spray-In Bedliners: All vehicles will be rustproofed and bedliners installed prior to use. The Department Superintendent/Director will compare cost and warranty when comparing rust-proofing services. The Department Superintendent/Director shall determine the least cost, best warranty method and regularly verify comparable cost for such protection.

Marketing practices of automobile manufacturers often require accessories to be purchased in packages. These packages often group accessories in such a way as to preclude the acquisition of one particular feature without also acquiring others. In cases where competing bids provide unspecified features along with specified features, staff shall limit its bid evaluation only to the specified accessories. No bid shall be considered enhanced or of greater value based upon the inclusion of unspecified equipment. Where all other bid considerations are comparable, unspecified accessories shall be considered in the bid evaluation.

Vehicle accessories acquired as an aftermarket feature, when acquired as an integral part of the vehicle's function, will be included as a part of the vehicle expense when computing the vehicle replacement costs. Snow plows, police top lights, prisoner restraint seats in squad cars, communication radios, and tool boxes for utility trucks are examples of some types of accessories that will be included as vehicle costs for this purpose.

The Department Superintendent/Director will be responsible for publishing all specifications. Specifications will be developed by the department superintendent/director assigned the vehicle with assistance by the Village Administrator. Specialized equipment specifications such as heavy equipment will be developed by personnel having the best understanding of the operating needs of the equipment. The Village Administrator will assist in specification development for specialized equipment.

All bids will require a written specification of equipment. Three approaches to bid specification will be utilized:

1. Performance Specification: Specifies the required results and criteria by which the performance can be verified.
2. Reference Standard Specification: Requires a product to be in accordance with an established industry standard.
3. Proprietary: Specifies actual brand names, model numbers, and other proprietary information.

Most bids are expected to contain a combination of the above. The use of proprietary specifications shall be limited to those acquisitions where a clear and overriding benefit to the Village exists. In all cases involving proprietary specification, equipment which will perform in a like manner as proprietary equipment, will be an acceptable substitute.

VEHICLE REPLACEMENT SCHEDULING:

Planned replacement scheduling is a strategy for forecasting equipment needs and the subsequent funding requirements. Routine review of replacement schedules allows for examination of equipment prior to actual replacement and provides for variations in individual vehicles/equipment which may justify either extended use or off-schedule replacement.

Village vehicles will be placed into a vehicle replacement schedule based on the assigned use and assigned an expected service life. The expected service life will be the period of time over which the estimated cost of owning and operating the vehicle reaches its lowest average annual cost while the equipment continues to meet performance requirements.

The determination of the lowest life cycle cost will include an evaluation of all costs associated with vehicle/equipment ownership. The costs are:

<u>Category</u>	<u>Cost Per Mile</u>
MC, Maintenance Cost	Increasing
OC, Operating Cost	Constant
DT, Downtime	Increasing
DEP, Depreciation	Decreasing
REP, Refurbish/Accident	Non-Periodic

Maintenance expenses are those incurred to repair or to maintain the vehicle. Maintenance expenses generally increase over the life of the vehicle/equipment. Operating expenses are those incurred while using the vehicle, including fuel, fluids, and operating supplies not included as maintenance expenses. Unlike maintenance expenses, operating expenses can be expected to be relatively constant over the life of the vehicle although, in most cases, operating expenses rise over time. Downtime reflects the expense of unavailable equipment. Downtime is a function of both the age/utilization of the vehicle and its maintenance. Depreciation is the difference in the purchase price of the vehicle/equipment and its resale value. Depreciation usually decreases over time. It can be thought of as that part of the vehicle/equipment value that is used up in any period of time.

For purposes of determining the average annual vehicle cost, maintenance costs include all parts and labor incurred when the vehicle is being repaired or serviced. Parts and repair costs for repair of accident damage is not considered maintenance cost. Operating costs include all fuel and supplies purchased and used by the vehicle operator. Downtime is the estimated average hourly rental or hourly replacement cost incurred by any vehicle class or individual vehicle where no vehicle class exists. Downtime values will be established annually for each

vehicle. Downtime includes all maintenance time. Downtime only includes the regular working hours of the shift to which the vehicle/equipment is assigned. Depreciation is calculated by taking the actual purchase price of any vehicle and subtracting the most current NADA (National Automobile Dealers Association) "book" retail price for the vehicle.

To determine the average annual cost of vehicle ownership and operation, the Village staff will annually analyze equipment. The calculation for this average annual cost (AC) will be:

$$AC = MC+OC+DT+DEP/\text{Vehicle age in years}$$

$$\text{Example-}3785.00 = 0+565.00+0+3220.00$$

2001 Dodge Ram 1500

This calculation will be compared with the average annual cost of like vehicles/equipment and with the average annual cost for the individual vehicle over its life. Any vehicle found to have an annual cost of operation that is less than class average will be reviewed for retention in the fleet beyond its scheduled planned replacement. Any vehicle found to be over the fleet average by 10 percent will be reviewed for earlier than scheduled replacement. Consideration will be given to significant repairs which may account for an aberration in the annual cost for the vehicle. Consideration of major foreseen expenses will also be considered.

The scheduled minimum replacement periods (whichever occurs first, i.e. years, miles, or hours) for vehicles/equipment is established as follows:

Dump Trucks, Diesel-heavy	8 yrs or 100,000 miles
Pickup Trucks, Diesel	8 yrs or 100,000 miles
Pickup Trucks, Gas	8 yrs or 100,000 miles
Police Squad Cars	5 yrs or 80,000
4-Wheel Drive (SUV)	8-10 yrs or 120,000
Intermediate Passenger Cars	8 yrs or 80,000 miles
Backhoe	7 yrs or 5000 hours
Front End Loaders	10 yrs or 12,000 hours
Construction Equipment	10-15 yrs or 12,000 hours (i.e., sewer jetter)
Tractors`	7 yrs or 4000 hours
Riding Mowers	4 yrs or 1500 hours
PTO Driven Mower	5-7 years

Transfer and Rotation of Vehicles within the Village Fleet:

The Village Administrator and staff will review vehicle use annually with user departments. Where similar vehicles are in use in the Village and the assigned

use of such vehicles results in significantly different mileage, hours, or other utilization measures, the Village Administrator, in conjunction with affected departments, will recommend to the Village President, transfers within the Village fleet in order to even out such differences. The goal of this policy will be to incur similar usage so that vehicles do not become unreliable due to age prior to reaching the mileage requirements for replacement.

Where possible, low use vehicle assignments will be accomplished by transferring a high mileage, low age vehicle to a different department.

Where such transfers, due to special set up needs, require an expense of more than 25 percent of the vehicle's resale value, the Village Administrator will prepare an estimate of average cost impacts of the transfer for the Village President. If the result of the average cost impact demonstrates a higher average cost for transferring the vehicle, the Village Administrator will not recommend replacement. When the transfer expense exceeds 50 percent of the vehicle value, the Village Administrator will not recommend the transfer unless the expenses incurred in a transfer can be shown to extend the vehicle's service life by at least 50 percent of the initial service life estimate for similar vehicles.

Department-Superintendent/Director of affected departments in a vehicle transfer will be informed of the recommendation to transfer vehicles/equipment. The Department Superintendent/Director may prepare a separate recommendation for the Village Administrator's consideration.

VEHICLE REPLACEMENT RESPONSIBILITIES AND PROCEDURES:

The following information describes the role and responsibilities in each step of the vehicle replacement procedure:

- I. Identify the list of vehicles requiring replacement.
 - a. A schedule of vehicle replacements is updated annually. The schedule is based on an expected vehicle life as listed above. Each year the replacement schedule is examined for vehicles due to be replaced in the next two years.
 - b. The Village Administrator distributes the listing of vehicles scheduled for replacement for the next two years to the various departments by December. Departments will review to identify possible changes.
 - c. The Village Administrator and affected departments review the list. The Village Administrator and department head will decide whether a vehicle can be removed or added to the list. The decision will be based on vehicle mileage, age, maintenance requirements, or

overall condition of the car. The list of scheduled vehicle changes, along with recommendations for each is sent to all affected departments. The Village Administrator reviews the recommendations and adjusts the schedule to reflect any further changes.

Exceptions

Capital Improvement: Additions to the fleet will be requested on a Capital Improvement sheet either during the budget process or at another time through specific approval of the Village Administrator. If approved these vehicles are then added to the vehicle/equipment replacement schedule.

Damaged Vehicles: Vehicles damaged beyond repair prior to a scheduled replacement are replaced through a bid solicitation or through the State Joint Purchase Program. Board approval is sought if the vehicle cost is equal to or exceeds \$5,000; if it is under \$5,000, Village Administrator approval is required.

II. Specifications Writing, Processing, etc.

- a. The User Department is responsible for writing specifications in conjunction with the Village Administrator. Departments with specialized equipment needs (ESDA, heavy equipment, etc.) will provide considerable input and research in specification development for this equipment.
- b. The Village Administrator and the appropriate departmental personnel shall agree on the final set of specifications prior to bidding any piece of equipment. Disagreements over the written specifications should be resolved between the Village Administrator and the department, but will be determined by the Village Administrator if not resolved at the department level.
- c. Any specifications which deviate from the standard specifications for village equipment will be separately brought to the attention of the Village Administrator prior to bid.
- d. The Village Administrator or designee will approve all equipment bid specifications prior to bidding

III. Bidding

- a. Department Superintendent/Director will prepare the bid packet if necessary according to Village and State requirements. The bid

packet will contain the necessary contracts, documents and affidavits that meet all Village, State and Federal requirements.

- b. Department Superintendent/Director schedules vehicles for bidding through the Village Clerk's office and then advertises for bid solicitation.
- c. Bid packets shall be sent to all known dealers in Champaign County as well as any other potential or interested bidders, including state contract bidders whenever applicable.

IV. Evaluating Bids

- a. The Village Administrator or designee shall attend the bid opening at the Village office. The intended user may attend the bid openings but their presence is not required.
- b. Some dealers give demonstrations of their equipment. This gives the intended users an opportunity to see the equipment in operation and helps the Village Administrator and Department Superintendent/Director evaluate equipment. The user department should be present for equipment demonstrations. Equipment demonstrations will be encouraged and any dealer wishing to demonstrate equipment will be allowed to do so. When all dealers have been allowed an opportunity to demonstrate equipment, the information gathered in such demonstrations will be used in the bid evaluation. Demonstration information will not be used in bid evaluations unless all dealers have been provided a demonstration opportunity.
- c. The Village Administrator and Department Superintendent/Director will review all bids and then recommend the low bid which meets all specifications. Any deviation will be required to be separately justified. See the purchasing policy for additional information about bid evaluation.
- d. The Village Administrator reviews the bids and recommendation with the user. The user provides comments and discusses the proposed recommendation. Disputes over recommendation are resolved by the Village Administrator.
- e. Board receives the recommendation along with alternatives and either approves or disapproves the purchase. If the vehicle cost is under \$5,000, the Village Administrator can approve the purchase without further Board action required. If the vehicle cost is equal to or exceeds \$5,000, Board approval is required.

V. Resolution

- a. The Village resolution and report to Board should explain the specifications, needs and recommendations for the purchase. The estimated cost of the vehicle will be included as well as the allocated funds in the equipment/vehicle replacement fund for the purchase.

VI. Placing the order

- a. The Village Treasurer's office will send a copy of the resolution to the dealer awarded the bid with a copy to the Village Administrator.
- b. A purchase order will be prepared and sent to the successful bidder in accordance with the purchasing policy.

VII. Adding or Deleting a Vehicle from the Fleet.

- a. A new vehicle authorization form is completed when adding a new vehicle to the fleet. The Village Treasurer will add new vehicles to the Village's insurance policy.
- b. Several options exist for disposal of vehicles from the fleet. Vehicles may be used as trade-ins, transferred to another department or division, sold to the public or scrapped. All requirements of the Village for disposal of surplus property will be followed. Disposal recommendations will be made in order to maximize the economic return to the Village.

Funding of Vehicle/Equipment Purchases:

Vehicle and equipment purchases represent a major and predictable expense for the Village. In order to even out annual fluctuations in vehicle/equipment expenditures, the Village Treasurer will maintain an amortization schedule for all vehicles/equipment. The amortization schedule will provide an annual amortization fee for the vehicle/equipment including all ancillary accessories. The amortization fee will be based on the predicted replacement cost of the vehicle/equipment and the anticipated service life of the equipment. The service life of the equipment will be initially determined by the schedule contained in the replacement policy. Where a shorter or longer actual service life develops, an adjustment in the amortization fee to reflect the change will be made when the service life adjustment is made. A discussion of the amortization fee calculation and components follows:

Equipment Replacement Fund:

The amortization fees for vehicles/equipment will be held in a Capital Equipment/Vehicle Replacement Fund. The ERF/VRF will be funded by budget contributions from each utilizing department at a level equal to the total amortization fees developed from the amortization schedule. All vehicle/equipment purchases will be budgeted in the ERF/VRF and paid for from funds accumulated in the ERF/VRF. Funding sources will come from utility tax revenue, water/wastewater billing, recreation fees and sales tax.

Service Life:

The service life is the anticipated years that a vehicle/equipment will be kept in the position for which it is acquired. The expected purchase price of the vehicle is to be recovered over this period. When a vehicle is transferred into a second position after serving its full service life in an initial position, the used vehicle/equipment service life for the secondary position will be its expected years of service in that position. In the case where a vehicle/equipment serves a front line use and then serves a period of reserve status, the front line service period will be its service life and the replacement cost shall be recovered over its front line service life. Reserve status equipment will not be-amortized.

Replacement Cost:

The replacement cost will be the estimated cost of the vehicle, if it was to be purchased, in the year in which the calculation is being made. In most cases the replacement cost will be equal to the last purchase price for a similar vehicle/equipment when a purchase has occurred in the fiscal year in which the calculation is being made. When no purchase has occurred, an estimate of such purchase costs will be made based on industry price guides, State bids, or similar published statistics. If no published guides exist, the Village Administrator will determine a replacement cost estimate by a survey of other government agencies. The used value will be the expected replacement cost for determining the replacement value for the secondary use transfers within the fleet.

Interest Payment Credits:

Interest or investment revenues accruing in the equipment replacement fund will be used to offset amortization fees for the following budget period. The total amortization fees shown in the budget as a transfer to the ERF/VRF will be adjusted by an amount equal to the interest of investment revenues for the previous year. The credit will be split as a percentage of the total ERF transfer for each fund activity. Each fund with a transfer to the ERF/VRF will receive a credit for that percentage of the interest and investment revenue as reflected in their percentage of the total transfer to the ERF/VRF. Credit will be calculated by adding all amortization fee payments for a vehicle/equipment date of purchase.

Inflation:

Each year the rate of inflation for vehicles/equipment, as determined in the Bureau of Labor and Statistics annual publication or in a similar publication, will be used to predicted future vehicle expense based on a vehicle/equipment estimated replacement date.

Salvage Value:

Salvage value is the estimated trade in price, estimated sale value, or value as estimated in a nationally published used vehicle/equipment guide.

Amortization Fee Calculation:

$$AF = \frac{(\text{Current Replacement cost} - \text{Current Salvage Value}) \times (1 + \text{Inflation Rate})}{(\text{Service Life})}$$

Example – 2001 Dodge Ram 1500

$$\frac{1849.75 = 12,150.00 - 10,425.00 \times 1.07}{(\text{Service Life})}$$

Where: AF = Amortization Fee

Remaining Service Life = Service life minus years since purchase

Alternate Means of Providing Vehicles/Equipment

Leases: Where vehicles or specialized equipment are required for a short period of time, the Village Administrator may authorize departments to lease such equipment, provided that the expense of the lease does not exceed \$10,000. In the case where the lease is equal to or exceeds \$10,000 Board approval of the lease will be required. Leases will be utilized to reduce purchase expenditures while allowing use of equipment when needed. The basis for a decision to lease as opposed to a purchase will include an analysis of the average vehicle cost as described in the replacement schedule and be reviewed by the Village Administrator.

Date Approved: 05/28/02

Revised 05/01/14

The scheduled minimum replacement periods (whichever occurs first, i.e., years, miles, or hours) for vehicles/equip. is established as follows:

Dump Trucks, Diesel-heavy	8 yrs or 100,000 miles
Pickup Trucks, Diesel	8 yrs or 100,000 miles
Pickup Trucks, Gas	8 yrs or 100,000 miles
Police Squad Cars	5 yrs or 80,000
4-Wheel Drive (SUV)	8-10 yrs or 120,000
Intermediate Passenger Cars	8 yrs or 80,000 miles
Backhoe	7 yrs or 5000 hours
Front End Loaders	10 yrs or 12,000 hours
Constuction Equipment	10-15 years or 12,000 hours (i.e., sewer jetter)
Tractors	7 yrs or 4000 hours
Riding Mowers	4 yrs or 1500 hours
PTO Driven Mower	5-7 years

CAPITAL IMPROVEMENT POLICIES

May 1, 2014

I. Purpose & Definition

The Village will develop a five year plan for capital improvements, update it annually, and make capital improvements in accordance with the Plan.

Definition of Capital Improvement: A capital improvement is defined as "an expenditure in excess of \$5,000 for the planning, design and construction of a physical improvement or associated fixed equipment needing replacement within a five year period."

Reason for the Policy: This statement explains the purpose of the Capital Improvements Policies and defines the scope of the Capital Improvement Plan.

II. General

Construction of Quality Projects: Construction of quality projects is desired. Design will be done with emphasis placed on functionality and durability, and to minimize maintenance costs and to delay rehabilitation and replacement as long as practicable.

Protection of Investment & Cost Minimization: Provide for maintenance of the Village's physical assets at a level adequate to protect the Village's capital investment and minimize rehabilitation and replacement cost over the life cycle of the improvement.

Maintenance & Rehabilitation: Provide for the adequate maintenance and the orderly rehabilitation /replacement and expansion of the Village's infrastructure.

Maintenance to Expansion Ratio: Attempt to more equally balance capital improvement funds for rehabilitation/replacement projects and for expansion projects.

Balanced Allocation of Funds Among Systems: Attempt to use a balanced approach to the allocation of capital improvement funds on a system-by-system basis to insure that all such systems are upgraded and developed over time.

Annexations/New Development: The Village will facilitate the construction of infrastructure across another property to serve a new development, based upon an annexation or development agreement, and will recover its cost by assessing a fair share to those who benefit from the improvement.

Staff Resources: The Village will program those projects which are reasonably accomplishable with the staff resources that are available.

Reason for the Policy: This item establishes general guidelines for capital planning.

How the Budget Conforms with this Policy: Board of Trustees and Staff take these guidelines into consideration when reviewing project requests. Growth as well as new responsibilities, e.g., Wastewater Treatment Plant Expansion project requires a large investment in infrastructure expansion. Routine transportation system maintenance, major drainage projects, along with park development represents a significant investment of public funds.

III. Funding for Capital Improvements

Major Revenue Sources: Major revenue sources for capital improvements are as follows: Capital Improvements Funds, Motor Fuel Tax Fund, General Corporate Fund, Water Operations Fund, Wastewater Operations Fund, TIF Funds, Bond Funds and Parks Fund.

Wastewater Systems: The WWCI fund will be used to finance wastewater expansion and rehabilitation. The "West Mahomet Interceptor Project" engineering and infrastructure is planned for fiscal year 2013/14 and will utilize the funding sources of the WWCI. 100% of wastewater connection fees, and a significant portion of sanitary sewer user fees are used to fund these capital improvements.

Water System: The WCI fund will be used to finance water system expansion and rehabilitation of water lines serving Franklin and Lincoln Street. 100% of Water connection fees, and a significant portion of water user fees are used to fund these capital improvements.

Transportation System (includes streets, sidewalks, bikepaths and drainage systems): The Village adopted a Simplified Telecommunications Tax in February 2004 which was implemented in July, 2004, to help fund major transportation system improvements. The Transportation System Capital Improvement fund includes receipts from the Simplified Telecommunications Tax and developer reimbursements. The Simplified Telecommunications Tax receipts as of April 30, 2014 have totaled \$1,665,758.47. **\$1,855,515.87**. The Motor Fuel Tax fund relies upon receipt of state-shared revenues. Funds are appropriated in the Transportation System Capital Improvement fund and Motor Fuel Tax fund for various projects.

Unallocated Reserve for Capital Improvements: An unallocated reserve shall be established for capital improvements within the Water Capital Improvement, Wastewater Capital Improvement, Transportation Capital Improvements, Motor Fuel Tax and Parks funds. The reserves in these funds are allocated for future projects as programmed in the Capital Improvements Plan.

Reason for the Policy: The item defines sources of funding for capital projects and indicates what types of projects are appropriately funded from each of those sources.

How the Budget Conforms With this Policy: Capital improvement projects have been funded in accordance with this policy. Projects are individually reviewed by Board and Staff with funding source as one of the items considered in the evaluation.

IV. **Criteria for Evaluating Relative Priority of Projects**

Within the broad categories of planning, efficient utilization of public resources, economic development, and safety, the Board of Trustees and Staff use the following criteria to evaluate the relative merit of each capital project:

Coordinated Projects: Projects that are coordinated with another jurisdiction or projects that are coordinated to improve several infrastructure systems at the same time would receive higher priority than those that are not. Example: Street projects that include sanitary and storm sewers, street lights, sidewalks, bike paths, water main and streetscape would have higher priority than street projects not including other systems, e.g Eastwood/Franklin Street Improvement.

Economic Development: Projects that help retain existing businesses, provide new business investment in Mahomet, or aid in the formation of new jobs would receive a higher priority than those that do not. Example: Projects increasing system capacities in order to accommodate growth and development would receive higher priority, e.g., Wastewater Treatment Plant expansion project, infrastructure extensions for proposed business developments east of Mahomet.

Health & Safety Hazards: Projects that correct a health or safety hazard or prevent a critical breakdown of a Village facility will be given priority. Example: Adding or replacing sidewalks along a busy arterial to provide safe walking routes, e.g., Eastwood and Franklin Street.

Inclusion in Approved Master Plans: Projects that are included in approved area plans, master plans such as infrastructure master plans, or projects that include multiple phases requiring longer term planning would receive a higher priority than those that are not. Example: The expansion of the wastewater treatment plant to serve areas that will need wastewater utilities. e.g. West Mahomet Interceptor Sanitary Sewer project.

Maintenance, Rehabilitation, and Replacement Prioritization: First priority should be given to funding projects that provide preventative maintenance to extend infrastructure life and reduce life cycle cost. Second priority should be given to funding reparative maintenance to avoid a critical failure. Third priority should be given to projects that replace or provide major rehabilitation of existing infrastructure. All types of projects should be adequately funded before significant funds are diverted to new expansion projects. Example: Oil and chip or microsealing to prevent deterioration should receive higher priority than building asphalt overlays to repair the surface, and both would be higher than projects to reconstruct failed pavements. The goal of this criterion is to help assure adequate levels of funding for preventative maintenance rather than more expensive repair or replacement.

Mandated or Contractual Obligation: Projects that are required by a contractual obligation that is approved by Board or mandated by the State or Federal governments would receive a higher priority than projects that are not. Example: Project to dechlorinate effluent from the WWTP to meet EPA requirements would receive higher priority.

Neighborhood Development and Protection: Projects that are a component of a systematic neighborhood development plan or strategy or that receive support of an active neighborhood group should be given priority. Example: Projects to build a facility requested and supported by a neighborhood such as sidewalks would receive a higher priority.

Outside Funding: Projects that have outside funding would have higher priority than those projects funded only with Village revenue. The higher the portion of outside funding, the higher the priority. Possible sources include Grant Funds, IDOT, and private sources. Consideration should be given to “sweat equity” provided by active neighborhood groups. Example: Transportation Enhancement Program Grant, e.g. Lake of the Woods Multi-Purpose Pathway Project.

Size of Benefiting Population: Projects that benefit more people should have higher priority than those that benefit few. Example: Streets with higher average daily traffic should be improved before streets with lower traffic volume, e.g. Main Street, Eastwood/Franklin Drive, State Street and Division Street.

Reason For The Policy: Project requests consistently exceed funds available for most funding sources. Since not all proposed projects can be funded, funds must be spent in the most cost-effective manner, balancing the many priorities for use of the funds.

How the Budget Conforms with this Policy: Recommendations contained in the proposed Capital Improvement Plan are generally consistent with priorities.

V. Long-range Facility Planning

Purpose of Long-range Facility Planning: To protect the capital investment in its existing facilities, the Village shall prepare long-range facility plans, e.g. Wastewater Treatment Plant Expansion. The purpose is to assess the functional viability of those facilities and anticipate improvements that may be needed to maintain modern, efficient, safe and adequately-sized Village facilities and to extend the life of the buildings

Process: The process for developing long-range facility plans shall include, at a minimum, the following steps:

Analysis of Existing Conditions: Purpose is to determine the existing use of the facility as it relates to programs and services conducted from the premises and to identify existing limitations and problems needing to be addressed. In addition, projections shall be made of growth in existing programs and services in order to maintain existing levels of service as the community grows and changes. An attempt shall be made to identify new programs which may be implemented in the next 10 years.

Identification of Future Goals and Objectives: Based on established Board policy and direction from Village Board, goals and objectives shall be identified which establish desired standards for the facility and the programs and services conducted from the facility.

Facilities Plan: The long-range plan shall evaluate the facility over at least a ten year period based on the goals and objectives. It shall consider the impact of Village growth and development on programs and services identified above. The plan shall then assess the implications of the changes on the available space and functionality of the building design; identify alternatives and prioritize projects to address existing and future needs identified in the process. A staged facility plan will be recommended which will identify specific projects, their costs and a proposed schedule for implementation.

Design and Construction: The identified projects will be scheduled through the Capital Improvement planning process.

Prioritization: Improvement projects shall be prioritized based on the relative severity of the problem or need they are intended to address. The following types of problems and needs shall in their relative order or priority serve as a general guide:

Limitations of existing facilities which are undermining the successful delivery of services and programs to the citizens in a responsive and responsible way; in order to maintain the levels of services established by Village Board.

Lack of space to house staff and/or equipment required to implement new programs and/or services established by Village Board.

Conditions of overcrowding which reduce staff efficiency and effectiveness in performing assigned duties.

Efficient building layout and design shall be encouraged so that the utilization of existing Village facilities is maximized. Enlargement of facilities to address identified space needs shall be considered next. New construction shall be considered as a last resort.

Building improvements shall be designed to allow for future expansion, at such time as it is needed, with the lowest reconstruction costs possible.

In those cases where (a) specialized expertise is required that is not available on the Village staff, (b) neutrality is considered desirable or (c) staff resources are not available to meet the necessary time frame established by Village Board, it is considered appropriate to use outside professional services to conduct such planning effort beginning with the facilities plan.

Reason for this Policy: This policy is designed to ensure that facility improvements take place in a planned and cost effective manner.

How the Budget conforms with this Policy: The Village explores alternatives for funding major building facility improvements and expansions which are determined to be high priority according to these criteria. Though generally used for transportation system improvements, G.O. bonds may be utilized to fund such projects.
